Computer Science
University of Toronto

09/2017 - 11/2019

9.0 credits completed

- Introduction to Computer Programming
- Introduction to Computer Science
- Software Design
- Introduction to the Theory of Computation
- Computer Organization

PERSONAL PROJECTS

Breddit - A Reddit Clone - CRUD Application (08/2020)
- Includes core features of Reddit
- Created using React (with React Router) and mobile-first design
- Firebase used for authentication, database, and storage
- View live site: https://reddit-clone-a7ea1.web.app/ ↗

WeatherCheck (07/2020)
- User can enter a city name and current weather data is displayed
- Uses OpenWeatherMap API to fetch weather data
- User may use Geolocation API to get current weather in their area
- View live site: https://sher-s7.github.io/react-weather-app/ ↗

Tea Time (06/2020)
- Responsive restaurant page created with React
- Adobe After Effects and react-sprite-animator used to create a spinning 3D teacup on hover
- View live site: https://sher-s7.github.io/react-restaurant-page/ ↗

To-do list - CRUD Application (05/2020)
- A to-do list created using modular JavaScript, HTML, CSS, and local storage
- Creation of projects and tasks which may be updated and deleted
- Options to sort by date created, date due, and priority
- View live site: https://sher-s7.github.io/todo-list/ ↗
